	Policy Type					
Modical	Administrative	Daymont				

Medical Policy Statements prepared by CSMG Co. and its affiliates (including CareSource) are derived from literature based on and supported by clinical guidelines, nationally recognized utilization and technology assessment guidelines, other medical management industry standards, and published MCO clinical policy guidelines. Medically necessary services include, but are not limited to, those health care services or supplies that are proper and necessary for the diagnosis or treatment of disease, illness, or injury and without which the patient can be expected to suffer prolonged, increased or new morbidity, impairment of function, dysfunction of a body organ or part, or significant pain and discomfort. These services meet the standards of good medical practice in the local area, are the lowest cost alternative, and are not provided mainly for the convenience of the member or provider. Medically necessary services also include those services defined in any Evidence of Coverage documents, Medical Policy Statements, Provider Manuals, Member Handbooks, and/or other policies and procedures.

Medical Policy Statements prepared by CSMG Co. and its affiliates (including CareSource) do not ensure an authorization or payment of services. Please refer to the plan contract (often referred to as the Evidence of Coverage) for the service(s) referenced in the Medical Policy Statement. If there is a conflict between the Medical Policy Statement and the plan contract (i.e., Evidence of Coverage), then the plan contract (i.e., Evidence of Coverage) will be the controlling document used to make the determination.

#### A. SUBJECT

## Alpha 1-Proteinase Inhibitor Injection

- Aralast
- Glassia
- Prolastin
- Zemaira

### B. BACKGROUND

The CareSource Medication Policies are therapy class policies that are used as a guide when determining health care coverage for our members with benefit plans covering prescription drugs. Medication Policies are written on selected prescription drugs requiring prior authorization or Step-Therapy. The Medication Policy is used as a tool to be interpreted in conjunction with the member's specific benefit plan.

The intent of the Alpha 1-proteinase inhibitor injection program is to encourage appropriate selection of therapy for patients according to product labeling and/or clinical guidelines, and/or clinical studies, and also to encourage use of preferred agents.

### C. DEFINITIONS

N/A

#### D. POLICY

I. CareSource will approve the use of alpha-1-proteinase inhibitors, and consider their use as medically necessary with emphysema due to AAT deficiency when ALL of the following criteria are met:

- A. Alpha-1 proteinase inhibitor may be indicated when ALL of the following are present:
  - 1. Age 18 years or older
  - 2. Alpha-1 proteinase inhibitor serum level (ATT) when measured by rocket immunoelectrophoresis, radial immunodiffusion, or nephelometry, with the threshold
  - 3. Continued optimal conventional treatment for chronic obstructive pulmonary disease (eg, bronchodilators, supplemental oxygen if necessary)
  - 4. Current nonsmoker for 6 or more months
  - 5. Alpha-1 antitrypsin deficiency with PiZZ( proteinase inhibitor ZZ), PiZ(null), or Pi (null, null) phenotype
  - 6. Documented chronic obstructive pulmonary disease, as indicated by 1 or more of the following:
    - 6.1 Baseline FEV<sub>1</sub> between 30% and 65% of predicted value
    - 6.2 gi04001 Tw 0.976nFE(n)-12.2(e F)-5.4(E)-9.7(V)]TJ 199.32 5and6848 -0 0 6.48 240.48 523.2 0.28
