

Administrative Policy Statement  
INDIANA MARKETPLACE PLANS

## A. Subject

Pharmacy – Multi -ingredient Compound Policy .

## B. Background

Pharmacy compounding is defined as the combining, mixing or altering of ingredients to create a customized medication for a specific patient. Compounded medications are made based on a practitioner's prescription in which individual ingredients are mixed together in the exact strength and dosage form required by the patient.

## C. Definitions

- Multi -ingredient Compound – a product containing two or more ingredients that is not FDA approved and is prepared upon the order of a physician for a patient.
-

the requirements set forth in the CareSource Policy for Medical Necessity – Off Label, Approved Orphan and Compassionate Use Drugs OR

- The compound contains ingredients that were withdrawn or removed from the market for safety reasons OR
- The compound is for a product that is commercially available OR
- The compound is for purposes of convenience only.

Additional notes:

- The following compounded preparations are not considered medically necessary by CareSource as they have not been proven to be more effective than commercially available products:
  - Compounded implantable hormone replacement pellets or granules (such as estrogen-based implantable pellets)
